(not up and running currently)To switch the transmitter on, you need to send a CTCSS tone of 74.4 Hz.
The order of operation is thus: (allow for Doppler as necessary)1) Transmit on 145.850 MHz with a tone of 74.4 Hz to arm the 10 minute
timer

on board the spacecraft.

2) Now transmit on 145.850 MHz (FM Voice) using 67.0 Hz to PT the
repeater

on and off within the 10 Minute window.

3) Sending the 74.4 tone again within the 10 minute window will reset
the 10

minute timer.

This off the A0-27 website:

For the last 5 weeks ground controllers have been trying to contact A0-27. At

this point we have not been able to turn it on. We still have a few tricks

that we are planning on trying but these take time. We are hoping that we can re-establish communications.

At this time, we don't have an estimate for when A0-27 will be back on the air.

A0-27 is now in its 14th year on orbit. We will continue to try to recover

A0-27 until we run out of ideas.
